The Board considered information reflecting both static and dynamic indicators including, but not limited to, criminal history, police reports(s), institutional record, risk assessment(s) and parole plan/request. Due to the number and nature of his criminal offenses which reflects a high risk score on our risk assessment, the Board is not confident that Mr. Dumont could remain at liberty without violating the law and, therefore, is compelled to deny parole at this time. We do commend him, however, on his

The Board considered information reflecting both static and

**dynamic indicators including, but not limited to, criminal history, police reports(s), institutional record, risk assessment(s) and parole plan/request. The Board finds that Mr. Sanders was unable to provide insight into his motivation for the offense, the nature of his relationship with the victim and also that he distanced himself from the predatory components of a very serious and gruesome killing. In short, the Board did not find his responses credible and given the nature and severity of the offense, including the manner of death as well as his presentation before the Board, the Board would be hard pressed to parole him under the circumstances. To do so would not only depreciate the seriousness of the offense and promote disrespect for the law, but we simply cannot state that he can remain at liberty without violating the law. We will reconsider him in four years (May 2022). (GTD:LIFE) MAXIMUM VOTE: UNANIMOUS-Present; Pisaturo, Armesto, Cade, Cepeda**
