

Regular Meeting Minutes
Tiverton Recycling/landfill Committee

Thursday August 28, 2014

Members present: Stephen Berlucchi, Steven Rys, Dick Hart, Richard Guimond

- **Minutes approved 6/26/14 meeting**
- **Committee discussion began on the type of trash / recycling containers that would work best at recreation areas. There will be no containers placed at fog land beach. One of the considerations that needs to be addressed is that containers be able to withstand the harsh environment of Grinnell beach and be vandal proof. Another consideration will be whether the containers will need to be permanent mounted in place. This led to the discussion on the logistics issues of keeping the trash separated from recycling with present method of pickups using a trailer. The town does not have the proper equipment or the manpower necessary to do this job. Richard Hart suggested going out to bid to see what it would cost to have rubbish / recycling pickup at recreation areas. Committee concluded that more research will be necessary to develop more options.**
- **Committee was deliberating on a new area for recycling collection just inside front gate leading up to landfill both Richard Guimond and Richard Hart voiced their reservations about using that area. Stephen B. will look at other site options.**
- **Meeting adjourned**

Minutes prepared by Steven P Rys
