

Biosecurity Board Meeting February 25, 2011

Meeting Minutes

Topic: Intrastate shellfish transport

- All intrastate shellfish seed transport should be notified to CRMC Aquaculture Coordinator
- Use zone map draft 2/25/2011 with requested refinements
- Continue to allow movement of shellfish from zones of low disease incidence to zones of higher disease incidence
- Continue Sentinel survey with 8 to 10 zones
- Secure funding for continued sentinel survey
- Intrastate shellfish pathology report terms: pathology report 1 acceptable from January to May 31; subsequent seed transport needs pathology report within 60 of transport from the date of sample collection (until November 15)
- Develop shellfish restoration permit (DEM and CRMC joint effort)
