## **3. Old Business**

- None for this meeting

## **4. New Business**

- ARRT certification for fluoroscopy
  - Board members advised that when fluoroscopy is performed, the machine itself must be operated by a physician, physician assistant, or radiologist assistant. Radiologic Technologists can assist, and their assistance in fluoroscopy is part of their Radiologic Technology training, they do not require separate training or certification specific to fluoroscopy. Review of the ARRT website does not show a certification available for fluoroscopy.
- Requirement of CT permit to perform bone density scans
  - After review of information provided with regard to a machine which is used specific to bone density studies, Board Member, Ellen Alexandre, offered to contact the requestor for further information in order to determine whether or not the use of that machine would require a separate CT permit.

## **5. Motion to adjourn to Closed Session**
