

Newport Accessibility Advisory Committee

September 10, 2013

3:00 PM

Police Assembly Room

AGENDA

Old Business:

1. Lack of access to our city government. City intractable in regards to this issue. (Attitude is: We don't have to and you can't make us.) Follow-up on actions taken and next steps.
2. Midtown Oyster Bar. Multiple complaints over lack of access and discrimination from this restaurant. Actions we can take. We will need one or more of the complainers to come forward to assist with this. Joseph Cirillo, former member of the US Access Board will be joining us.
3. Other organizations that will offer support: Governor's Commission on Disabilities, PARI. Citizens without disabilities who have offered to support through picketing, letter writing, etc.
4. Intersection of Bellevue and Memorial. Audible signal approved but not installed. We still need to meet with state DOT to make intersection safer for pedestrians. We know the City will bring Mr. Lewis here only if the City thinks it's important. Next step?
5. Future of committee. Resources available for members continuing. Christopher DeGrave from the Governor's Commission on Disabilities has been invited, as has Leo Canuel from PARI.
